## SUMMARY

Aspiring software engineer with a strong academic foundation and hands-on experience in full-stack development, machine learning, and scalable web applications. Skilled in building end-to-end solutions across frontend, backend, and data-driven systems, with a passion for cloud technologies and analytics.

## SKILLS

Languages & Frameworks: Java, Python, JavaScript, Spring Boot, Flask, React, Node.js  
Tools & Platforms: Git, Postman, MongoDB Compass, MongoDB Atlas, MySQL, JDBC  
Data Science & ML: Big Data, Data Visualization, Machine Learning, Scikit-Learn, LSTM, Random Forest, Linear/Decision Tree Regression  
Web Development: Frontend (HTML/CSS, React), Backend (Node.js, Flask, Spring Boot), REST APIs

## EXPERIENCE

**App Development – Mentor Circuits** | *Coimbatore* Jun 2025  
• Contributed to the development of a password generator application from concept to deployment.  
• Collaborated with a cross-functional team to enhance UI/UX and backend features.

## PROJECTS

**LSTM-Based Crime Prediction System** | *AI Model Developer – Python, LSTM* May 2026  
• Built an LSTM neural network model to forecast future crime patterns from historical crime records.  
• Analyzed location, type, and time data to learn temporal trends and improve prediction accuracy.

**HR Management System using JDBC** | *Backend Developer – Java, MySQL* Jan 2026  
• Developed a Java-based application to automate core human resource operations for an organization.  
• Implemented a secure, user-friendly CRUD interface for HR personnel using JDBC and MySQL.

**Student Performance Prediction System** | *AI Model Developer – Python, Flask, Scikit-Learn* Dec 2025  
• Built an end-to-end ML web application predicting final exam scores from study hours, attendance, sleep, and prior performance.  
• Implemented data preprocessing and feature scaling, and evaluated Linear Regression and Decision Tree models using  $R^2$ , MAE, and MSE to select the best fit.

**Password Generator** | *Frontend Developer – Java, Spring Boot* Jun 2025  
• Developed a secure password generator leveraging Device ID and Instance ID, reducing manual errors by 90%.

**Heart Disease Prediction System** | *Backend & Frontend Developer – Python, Flask, HTML/CSS* May 2025  
• Built a disease prediction system using the Random Forest algorithm on patient health data.

**Blood Donation App** | *Full-Stack Developer – React, Node.js, MongoDB* Apr 2025  
• Developed a web application connecting blood donors with recipients by blood group and location.  
• Reduced donor search time via real-time availability tracking and request notifications.

## EDUCATION

**Dr. Mahalingam College of Engineering and Technology, Pollachi** Expected May 2027  
*Bachelor of Engineering, Computer Science and Engineering* | CGPA: 7.7

**Sowdambikaa Matriculation Higher Secondary School** Apr 2023  
*Higher Secondary Education* | 83%

## CERTIFICATIONS

- MongoDB Atlas Certification – Jun 2025
- Python Bootcamp – Infosys Springboard – May 2025
- NPTel – Environmental Impact Assessment – Oct 2024
